Looking ahead

STEP 1

1 will, won't 7a

Complete the sentences with 'll or won't.

1 It 'll be for me.

2 A: Hurry up! You be late for school.

B: I be late! It's only ten past eight.

3 A: I don't want to go through the city. We get lost.

B: We get lost. I've got a street map.

4 Let's ask her. She know.

5 You enjoy it. It's a great film.

6 They win. They aren't playing well.

2 Predictions 7a, 7c

Read Anna's horoscope and complete the sentences. Use *will*/'ll or *won't* with the verbs in the box.

meet ~~argue~~ get change be (x 2) have help

GEMINI

May 21st – June 21st

You'll disagree with a friend at the beginning of the week and you'll feel sad. You'll talk to other friends about the problem, but they won't listen. But be optimistic! Your positive attitude will help you. Things will be different at the end of the week and you'll feel better. You'll get an exciting phone call. A new and interesting person will come into your life. Friday will probably be the best day of the week.

- 1 Anna will argue with a friend.
- 2 She a good time in the first part of the week.
- 3 Her other friends her.
- 4 The situation at the end of the week.
- 5 She a phone call.
- 6 It an ordinary phone call.
- 7 She a new and interesting person.
- 8 Friday probably a good day.

3 Reading *Our changing planet*

Look at the maps and read the text. Are the sentences true or false? Correct the false sentences.

250 MILLION YEARS AGO THERE WAS ONE BIG CONTINENT ON EARTH. Scientists called it Pangaea. Very, very slowly, Pangaea divided, and today there are five separate continents. But the shape of our world is changing because the continents move about ten centimetres every year.

So what will our planet be like 50 million years from now? Scientists think that the Atlantic Ocean will get bigger and the Pacific Ocean will get smaller. The Mediterranean Sea will disappear. Europe and Africa will join together. North and South America will separate, and Australia will move north. In Africa, the Great Rift Valley will get longer and East Africa will become an island. Alaska and Russia will join together.

What will happen after that? Some scientists believe that, in 250 million years' time, the five different continents won't exist. There will be one big continent again – a new Pangaea!

Our planet in 50 million years' time

... and in 250 million years' time

1 The shape of our world will always be the same.

False. The shape of our world will change.

2 The oceans will all get smaller.

3 In 50 million years' time the Earth won't be very different.

4 The Mediterranean Sea won't exist.

5 Europe and Africa won't be separate continents.

6 Australia will move nearer to Asia.

7 Africa will become an island.

8 250 million years from now, there won't be five different continents.

4 Extension *A horoscope*

Choose a star sign and write a horoscope. Write at least three predictions.

Aries Taurus Gemini Cancer Leo Virgo Libra Scorpio Sagittarius Capricorn Aquarius Pisces

ARIES – You'll have a difficult day tomorrow.
